

From Diagnosis to Goodbye

A keepsake for book signing guests

Thank you for being here

I wrote this book to help us see the person beyond the diagnosis and keep their voice present through every stage of the journey.

01 See the person

Ask what matters most to them today, beyond the diagnosis.

02 Hear the voice

Give them time to speak before making plans on their behalf.

03 Honor the journey

Revisit their wishes as needs and circumstances change.

Carry the conversation forward

Who in my life needs to feel seen and heard right now?

What conversation have I been meaning to begin?

What will I remember from our time together today?

Explore the book and companion resources

From Diagnosis to Goodbye by Chaplain Derrick Hall offers guidance for patients, families, caregivers, and the people who support them.
